Yet another epic series of comics from the god of manga, Osamu Tezuka. He's kind of like Tupac; although he passed away, his work keeps coming out. Drawn in Tezuka's style, this is the beginning of a multi-volume series about Buddha's life. The thing that stinks about stuff like this is that people think they know Buddha because of crummy films, fake American cults, and the Dalai Lama. You'd think that Tezuka would stray, too, and Japan-ify Buddha, but he seems to be in tune with history.
